

OPERA | MATERIALS CONTROL MANAGEMENT

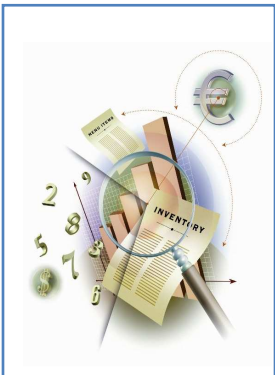

MICROS-Fidelio, the world's leading supplier of hospitality technology is proud to announce the release of the Opera Materials Control Management Edition. Materials Control provides a scalable solution to meet the Procurement and Materials Management requirements with in your organization.

The Opera suite of products has been developed for the 10g Oracle® platform, one of the world's most scalable and robust database engines, providing opportunities to all markets and readily supporting the demand for internet, intranet and ASP based solutions.

YOUR SOLUTION

- A fully featured Materials Management solution for **standalone operations**; restaurants, hotels and catering establishments, which will bring control to all your inventory management needs.
- For the **chain establishments**: extend your brand standards and operating procedures via homogenous workflow and control of critical inventory and sales tasks.
- Enable true enterprise management capabilities from a **Central Deployment** of Materials Control; aggregate all available data from distributed locations, leverage the economies of scale from central purchasing, analytics and group wide management.
